Deliverable 1 — Application Source Code

- Frontend source code
- Backend source code
- Database models/schema ERD
- Configuration files

Deliverable 2 — Documentation

-
- README for Frontend and Backend including all details for starting and integrating the project
 - Environment variable requirements
 - Any Third-party services used

Deliverable 3 — Client Handover

- Repository Access
- Permission to use the source code in production with credit

4. Technical Architecture

Frontend: React

Backend: Node & Express

Database: MongoDB

Source Control: GitHub

5. Client Responsibilities

The client agrees to:

- Provide accurate business information.
- Provide required logos, branding assets, images, and content if previously agreed upon.
- Identify an authorized Client Representative.
- Communicate with the team within the agreed upon timeframe and domain
- Provide feedback within agreed review periods.
- Review designs and requirements when requested.
- Provide information required to configure production services.
- Approve completed deliverables.

Delays in client-provided materials, decisions, approvals, or access may affect the project schedule.

6. Development Team Responsibilities

The development team agrees to:

- Implement approved project requirements and features.
- Maintain the source-code repository.
- Follow any style guides provided by the client.
- Follow the agreed development workflow.
- Maintain reasonable technical documentation.
- Communicate project risks and blockers.
- Demonstrate completed functionality.
- Conduct project handover as agreed upon in section 3.1.

7. Client Communication

The client will communicate with the team at the frequency agreed upon by all parties. The agreed upon time and domain are hereby set as follows: **Add details of the time and type of communication you agreed upon with your client**

8. Assumptions

This SOW assumes that:

- The client will provide required content and assets on time.
- The client will provide timely feedback as agreed upon in section 7 of this document.
- Required third-party services remain available.

9. Approval

By approving this Statement of Work, the parties acknowledge that they understand the project scope, deliverables, responsibilities, architecture and assumptions, described above.
